EXPERIENCE

AI Full Stack Senior Developer

Impressico Business Solutions

08/2024 - Present Noida, India

- Optimized Vercel CI/CD deployment pipelines, reducing build and **production deployment failures by 90%** and enabling faster, more reliable release cycles.
- Reduced backend API calls by **80% by implementing Next.js Static Site Generation (SSG), caching, and performance optimization strategies**, significantly improving application performance and user experience.
- Led the **Strapi CMS upgrade from v4 to v5**, refactoring custom plugins, middleware, and database queries, resulting in a 30% improvement in backend response time and improved production memory efficiency.
- **Reduced yearly infrastructure costs by over $1200 by replacing third-party dependencies** with optimized custom React hooks and reusable internal modules, reducing external dependency overhead.
- Designed and deployed automated CRON-based data synchronization services between Strapi CMS and HubSpot, ensuring reliable, production-grade data consistency and synchronization.
- Strengthened application security by implementing **HTTP security headers, API rate limiting, and bot mitigation strategies, reducing malicious traffic and improving overall platform security**.
- Contributed to post-acquisition integration initiatives for Pi.ai (Inflection AI) within Microsoft's ecosystem, supporting technical transition, system compatibility, and integration stability.

Full Stack Developer

Biz2Credit 08/2021 - 08/2024 Noida, India

- Designed and integrated secure eSign and eNACH modules for Tata Capital's SME Loan platform, enabling compliant, end-to-end digital loan processing and reducing dependency on manual verification.
- Architected and implemented the "Sugam Loan" digital approval workflow, optimizing business logic and API orchestration to significantly improve loan approval turnaround time and enhance the user experience for SME applicants.
- Reduced production defects by 75% through systematic code refactoring, performance optimization, structured logging, and improved testing workflows, leading to higher platform stability and reliability.
- Engineered a modular, reusable workflow framework using component-driven architecture and configurable business rules, accelerating feature rollout across multiple loan products and improving development scalability.
