Address: Noida, Uttar Pradesh India

Summary

Dynamic Senior Full Stack Engineer with over 7.5 years of expertise in architecting scalable, high-performance cloud-native applications using the MERN Stack, Next.js, and microservices architectures. Proficient in designing distributed systems and secure authentication frameworks (JWT), along with performance-optimized APIs deployed on AWS.

Demonstrated success in fintech and enterprise platforms, particularly in managing large-scale NBFC loan processing systems that handle mission-critical, high-concurrency workflows. Committed to creating resilient, maintainable architectures that enhance business growth and operational efficiency through robust system design, database optimization (MongoDB, PostgreSQL), CI/CD automation, containerized deployments (Docker), and adherence to security best practices.

Skills

Frontend: **Next.js | React.js | Redux | Typescript | Javascript (ES6+) | Angular | Tailwind CSS | Bootstrap | HTML5 | CSS3**

Backend: **Node.js | Express.js | Strapi CMS (v4 → v5 Migration) | REST & GRAPH APIs | Microservices Architecture**

Authentication (JWT, OAuth2) | API Gateway Design | Security Best Practices

Database: **MongoDB | PostgreSQL | MySQL (RDBMS)**

Deployment: **AWS | Vercel | Git (Github/ Gitlab) | Docker | CI/CD Pipeline**

Work Experience

Impressico Business Solutions Private Limited

Full Stack Engineer | 2024 – Present

- Optimized Vercel CI/CD deployment pipeline, **reducing build and production deployment failures by 90%**, enabling faster and more reliable release cycles.
- Reduced backend API calls by **80%** by implementing **Next.js Static Site Generation (SSG) and caching strategies**, significantly improving application performance and user experience.
- Led **Strapi CMS upgrade from Version 4 to Version 5**, refactoring custom plugins, middleware, and database queries — achieving **30% improvement in backend response time** and enhanced memory efficiency in production.
- Reduced monthly infrastructure costs by **\$100+** by replacing third-party dependencies with optimized, custom-built React hooks and reusable internal modules.
- Designed and deployed automated **CRON-based data synchronization services** between Strapi CMS and HubSpot, ensuring reliable production-grade data consistency.
- Strengthened platform security by implementing advanced **HTTP security headers, rate limiting, and bot mitigation strategies**, significantly reducing malicious traffic.
- Contributed to post-acquisition integration efforts for **Pi.ai (Inflection AI)** under Microsoft’s ecosystem, ensuring smooth technical transition and system compatibility.

Biz2credit Private Limited

Full Stack Engineer | 2021 – 2024

- Designed and integrated secure **eSign and eNACH modules** for Tata Capital’s SME Loan platform, enabling compliant, end-to-end digital loan processing and reducing manual verification dependencies.
- Architected and implemented the **“Sugam Loan” digital approval workflow**, optimizing business logic and API orchestration to

significantly improve loan approval turnaround time and enhance user experience for SME applicants.

- Reduced production defects by **75%** through systematic code refactoring, performance optimization, structured logging, and improved testing workflows, leading to higher platform stability and reliability.
- Engineered a **modular, reusable workflow framework** using component-driven architecture and configurable business rules, accelerating feature rollout across multiple loan products and improving development scalability.

Previous Experience

Hestabit Private Limited

Senior software developer (Laravel) | 2020 – 2021

Proprofs

Software Developer (PHP) | 2021 – 2024

Education

Bachelor of Technology (B.Tech) – Computer Science & Engineering

HRM Institute of Technology & Management | 2013 – 2017

Projects

Impressico

- Legal Technology Hub (Aug 2024 – Present)
Tech: Next.js, TypeScript, Node.js, PostgreSQL, Strapi, AWS, Tailwind
- Gunner Roofing Platform (Oct 2025 – Present – Parallel Client Project)
Tech: Next.js, TypeScript, Node.js, MongoDB, Tailwind
- Pi Next (Sept 2025 – Short-Term Engagement)
Tech: Next.js, TypeScript, Node.js, MongoDB

Biz2Credit

- Loan Origination System – NBFC in a Box (Jul 2022 – Aug 2024)
Tech: React, Node.js, TypeScript, MongoDB, Express.js
- Tata Capital SME Loan Platform (Aug 2021 – Aug 2024)
Tech: Angular, React, Node.js, AWS Lambda, MongoDB
